

VMWARE CLOUD VERIFIED

Application and Approval Process

vmware®
CLOUD™
VERIFIED

Application and Approval Process for VMware Cloud Verified Badging

1. Partner applies for Cloud Verified badge at https://vcloudvalidation.com/cloud_verified
2. Partner reviews requirements and upon meeting criteria, fill out the form and submits it.
 - a. Note criteria:
 - i. Using all the products that are specific in the [VMware Validated Design for Cloud Providers](#)
 - ii. Partner tier level must be Enterprise or Premier
3. VMware verifies partner tier is Enterprise or Premier.
4. Upon tier validation, VMware sends an email to partner providing instructions on product usage submission (note: Usage Meter report shows products and versions).
5. Usage Meter report to be submitted by partner (monthly) for VMware approval.
6. Upon VMware verification of required products via the Usage Meter report, the Cloud Verified welcome email will be sent to the partner which includes hi-res Cloud Verified badge for use on partner website and marketing properties.
7. Cloud Verified approved partners will be featured on cloudverified.cloud and link to partners Cloud Verified page.
8. Partner must maintain a website landing page noting that a specific service offering(s) and data center(s) are Cloud Verified. Note that Cloud Verified applies to the specific service(s) and data center(s) where the Cloud Verified service is installed and running. Partner must submit a Usage Meter report for each location they wish to be noted as Cloud Verified.
